

Prodacapo Process Management

Identify, analyze, improve, measure and manage your processes

Prodacapo Process Management is a flexible, web-enabled and user-friendly process management tool. It supports all stages of your process work and allows you to document, communicate, analyze, measure and manage your business processes. This tool uniquely combines both process mapping and process costing functionalities in a single solution, enabling your organization to significantly improve operational performance and reduce costs.

Intuitive process charts and powerful analysis and

reporting options enable users at all levels to readily access, understand and take action on the basis of process information. And users of your choice can gain access to this information via their standard web browser.

The Prodacapo Balanced Scorecard and Interactive Business Planning solutions can easily be added to your system to allow enhanced process management. The Process Management solution can also be extended not just to allow process costing, but also to turn it into a full activity-based costing solution – Prodacapo ABC/M.

Fast and flexible process modeling

- Smart, easy-to-use model building techniques that reduce the time and money required for building and maintaining the process model
- Allows simultaneous process mapping to be carried out by a number of users in a networked environment
- Hierarchical mapping and visualization of processes and activities
- Several models of the same process possible
- Scalable solution making it possible to start with a small one-off project, expanding it later into an enterprise-wide installation

Ease-of-use

- Easy and intuitive to work with for all users, no matter what their position within your organization
- The terminology used in the interface can be customized to match your own in-house vocabulary

Document handling

- All types of documentation and links can easily be attached to your processes, activities and resources

Attractive graphical process maps

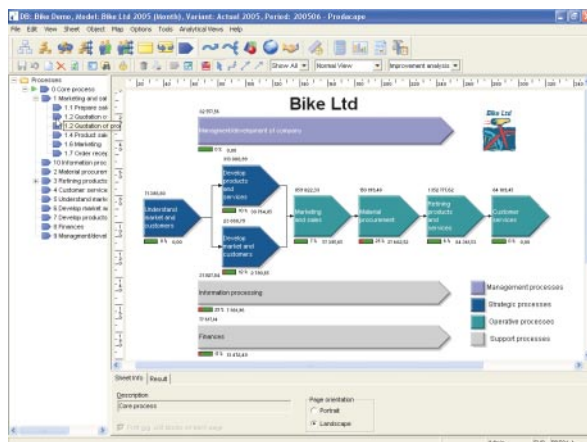

- Easy-to-understand and attractive graphical process maps make it easy to communicate and analyze processes and related information

Web-enabled

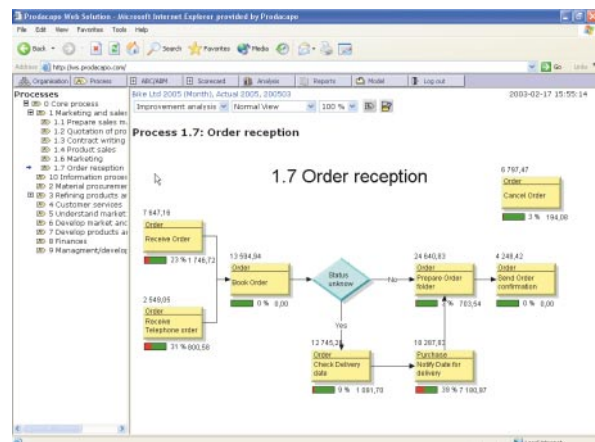

- Easy access via standard web browsers, providing cost-effective and easy communication of always up-to-date information
- Easy to integrate into intranets or portals

Improvement analysis

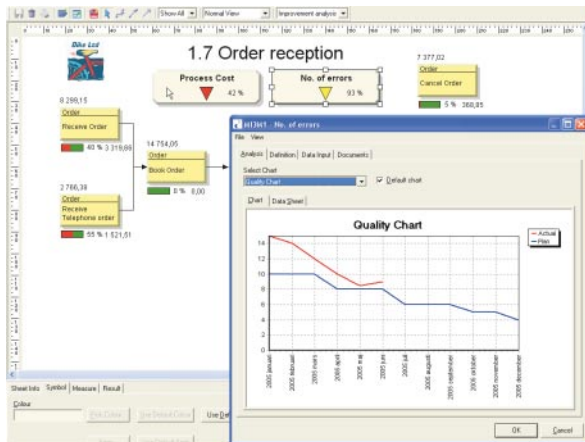

- Powerful functionality for the identification, visualization and prioritization of potential improvements

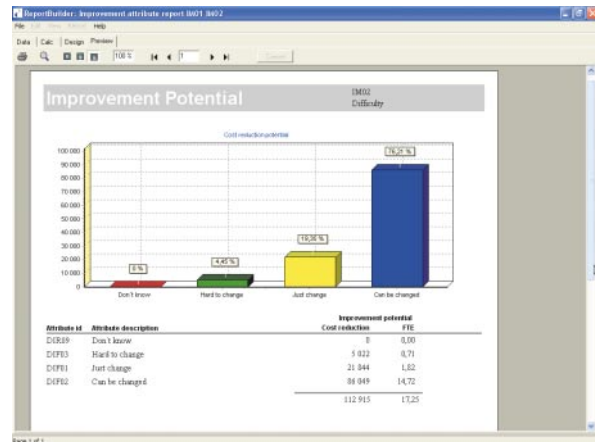

Easy-to-understand and attractive graphical process maps make it easy to communicate and analyze processes.

Process maps can be accessed via standard web browsers and include data such as improvement potentials.

Prodcapo Process Management allows you to easily measure and follow up the processes.

Reports are easy to create and can combine text and graphical charts. This report shows potential cost savings if improvements are implemented.

- Potential improvements can be quantified, indicating total savings in terms of time and/or money if they are implemented

Process costing

- World-class activity-based costing functionality enables you to easily and rapidly translate existing function-oriented accounting data into cost per process and activity
- Allows you to analyze and manage how time and money are utilized overall for various processes and activities
- Allows you to analyze and manage efficiency (cost per output), to identify cost drivers and to perform benchmarking of productivity between units
- Easily add the Prodcapo Interactive Business Planning solution for rapid simulation and planning of future costs and resource requirements

Seamless integration with existing systems

- Easy to integrate with existing IT systems to enable automatic updating of process costs periodically
- Easy to send data from and to MS Excel

User-friendly analysis and reporting

- Extensive suite of analytical charts, grids and reports
- Powerful built-in tool for easy custom free form reporting and analysis

Continuously measure and improve your processes

- Measures can be added to the process map. These measures show current status and trend. By clicking on the measure you will get charts showing planned and actual performance
- Easily add the Prodcapo Balanced Scorecard solution to allow enhanced process management

Extensive security

- Robust and extensive security features allow for information sharing on a need-to-know basis

Modern technology

- Based upon n-tier client-server technology and leading database engines

Technical requirements

- Please see details on our website
